Biosecurity - Unfortunately the Eglwys Nunydd Reservoir has become infected with a type of freshwater shrimp - *Dikerogammarus villosus*. This is harmless to humans but has an adverse effect on other life in fresh or brackish water. To prevent transfer of this organism to other bodies of water, and to prevent the incursion of any other species into Eglwys Nunydd, it will be necessary for all boats and equipment to be washed down on arrival at the site and also before leaving the site. Hoses will be available on the slipway.
